

CEMENCOL®

The brand for professionals

CEMENCOL® is a range of trustworthy glue-cement for professionals.

You have the appropriate glue-cement for each application. Select the one which best adapts to your needs.

M MORTEROS
TUDELA VEGUÍN

.COL

Indoor

C100 | C100B

Field of application

- For medium-high and high absorption ceramic materials in formats up to 30 x 30 cm.
- On horizontal and vertical indoor surfaces.
- On cement mortar supports.

Properties

Great workability • Excellent adherence • Colours: Grey and White.

Classic

C130 | C130B

Field of application

- For medium-high and high absorption ceramic materials (Groups IIb and III) with formats up to 30 x 30 cm.
- On horizontal outdoor surfaces.
- On horizontal and vertical indoor surfaces.
- On cement mortar supports.

Properties

Great workability • Excellent adherence • Optimum durability
• Without slip • Colours: Grey and White

Special plaster

CY00B

Field of application

- For PORCELAIN EARTHENWARE, stoneware, compact tiles, mosaics, gresite tiles. Scarcely absorbent pieces in general. (Groups Ia, Ib, IIa and IIb).
- For materials in formats up to 45 x 45 cm.
- On indoor plaster walls.

Properties

Great workability • Compatibility with plaster • Excellent adherence
• Optimum open time • Colours: White

Extra

Field of application

- For porcelain earthenware, stoneware, compact tiles, mosaics, gresite tiles. Scarcely absorbent pieces in general. (Groups Ia, Ib, IIa and IIb).
- For materials in formats up to 45 x 45 cm.
- Particularly indicated for swimming pools.
- On indoor mortar or concrete walls: for pieces in Groups Ia, Ib, IIa and IIb.
- On indoor mortar floors: for pieces in Groups Ia, Ib, IIa and IIb.
- On outdoor mortar floors: for pieces in Groups Ib, IIa and IIb.
- Appropriate for indoor plasterboard walls (PLADUR® type). CEMENCOL® PORCELANIC C2 is recommended for water repellent plasterboard as long as the excessive deformation of the support does not require the use of CEMENCOL® SUPERFLEX C2TE S1.

Properties

Great workability • Excellent adherence • Extended open time
• Slip-resistant • Extraordinary durability • Colours: Grey and White

C230 | C230B

Porcelanic

Field of application

- For porcelain earthenware, stoneware, compact tiles, mosaics, gresite tiles. Scarcely absorbent pieces in general. (Groups Ia, Ib, IIa and IIb).
- For materials in any size. Mechanical anchoring is necessary in the case of pieces exceeding 60x40cm and/or 40 kg/m².
- On indoor mortar or concrete walls and floors.
- On outdoor mortar or concrete floors.
- Appropriate for internal plasterboard walls (PLADUR® type), as long as the excessive deformation of the support does not require the use of CEMENCOL® SUPERFLEX C2TE S1.

Properties

Great workability • Improved adherence • Excellent open time
• Without slip • Extraordinary durability • Colours: Grey and White

C271 | C271B

Superflex

Field of application

- For low absorption ceramic materials (Groups Ia, Ib, IIa and IIb) and large formats: stone, marble, etc.
- On walls and floors.
- On indoor and outdoor.
- On concrete, mortar and even ceramic supports.
- Particularly indicated for FAÇADES, FLOORS WITH RADIANT HEATING AND PLASTERBOARD SUPPORTS (PLADUR® type).
- Mechanical anchoring is necessary in the case of pieces exceeding 60x40cm and/or 40 kg/m².

Properties

Great workability • Improved adherence • Extended open time
• Without slip • Extraordinary durability • Deformable
• Colours: Grey and White
